

Fill in the following information for your study(* are required):

* Location name: [default=unknown]

McMurdo

Measurer:

Lima Tango

Average replicates [y/n]: [default is y]

* # characters to distinguish specimen from sample: [default=1]

Lab protocol particulars:

☐ NRM: no lab treatment

leave blank if not needed

☒ AF: alternating field de(re)magnetization

peak AF field (mT) if ARM:

dc field (uT) for ARM/TRM

dc field (phi): [default=0]

dc field (theta): [default=-90]

☐ T: Thermal de(re)magnetization including Thellier, excluding TRM acquis.

☐ TRM: TRM acquisition experiment

☐ ANI: anisotropy of TRM,IRM or ARM

☐ I: IRM

coil: Coil number for ASC impulse coil

☐ I3d: Lowrie 3D-IRM

OK
